

UNDERSTANDING THE SCIENCE BEHIND MULLIGAN STEW

**NATURAL PET NUTRITION FOR
WHOLE BODY HEALTH.**

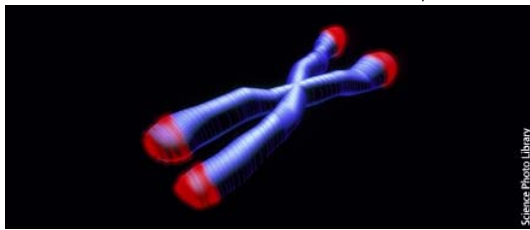

[Here's the healthful story...](#)

BIOCHEMISTRY & NATUROPATHIC METHODOLOGY = VERY HEALTHY PETS!

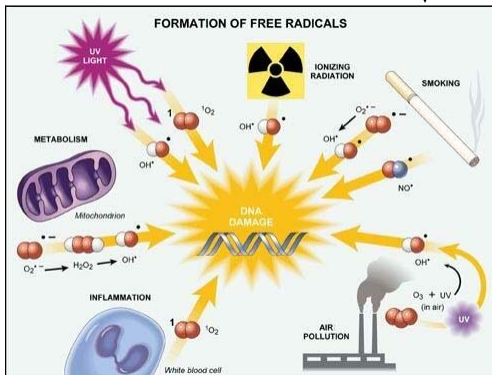

Cells and DNA

All living creatures are made up of millions of cells. The most important part of a cell is the nucleus or the “cellular brain”. Inside the nucleus are the building blocks of life called DNA. DNA tells each cell what specific role it plays in the body.

Telomeres ~ Protective End Caps

To help protect the uniqueness of the DNA, nature created a protective cap called a telomere, (in red). Each time a cell replicates, a piece of the telomere is lost. One theory of aging suggests the loss of the telomeres increases the cell’s vulnerability to toxins and contributes to cellular death.

Free Radicals

Cells are attacked by toxic molecules called free radicals, (cigarette smoke, environmental pollutants, and chemical preservatives in food & water, are examples). These free radicals attack the cells causing premature cell death.

Unlike many pet foods on the market today, Mulligan Stew is a *patent-pending* formula developed by a biochemist and naturopathic healer. Developed from sound scientific principals, Mulligan Stew promotes:

- ◆ Optimal cellular health for longevity
- ◆ Tissue detoxification from low-level toxin ingestion
- ◆ Proper bowel motility and cleansing
- ◆ A high protein, low fat diet

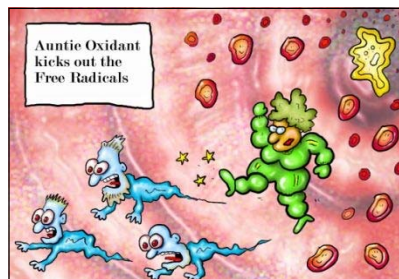

MULLIGAN STEW ~
OPTIMAL WHOLE BODY
HEALTH FOR PETS

Simply put, the ingredients in Mulligan Stew work together to destroy free radicals and toxins, and to protect the cells. The resulting cellular integrity helps insure your pet’s body is healthy and functioning just as nature intended.

The Naturopathic approach!

Feeding Mulligan Stew will improve your pet’s health by helping to repair damaged cells, increase antioxidant levels, protect cellular integrity and balance the body for optimal whole body health.

Antioxidants

Fortunately, compounds called antioxidants help to break down free radicals and toxins in the body. **ANTIOXIDANTS ARE FOUND IN COMBINATIONS OF CERTAIN HEALTHY FOODS!**

Synergistic Ingredients

Mulligan Stew’s patented ingredients work together to devour the pollutants, free radicals and toxins from your pet’s body. And, together with brown rice, cabbage & horseradish, this powerful super-formula also provides effective bowel motility and cleansing.
